

## Separator Screens

Screens, Parts and Accesories

### Pretension Screens

Our Quality Pretension Screens are made to fit equipment manufactured by Sweco, Midwestern, Kason, Vibracon, TEA, and other original equipment producers. The tension of the screen is provided

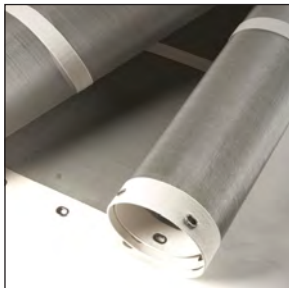

by epoxy resin or carefully controlled spot welds. Our entire range of round Pretension Screens are shipped with a gasket attached, made from approved FDA components, to speed screen changes.

Each of our Pretension Screens uses a rolled foundation ring made from high quality 304 stainless steel. The ring is seal welded to eliminate your product from getting trapped inside the rolled form which provides a cleaner contact surface for your finished product.

Sizes available for our Pretension Screens:

**18", 24", 30", 40", 48", 60" and 72"**

Other sizes are available upon request.

### Edged Screens

Our Edged Screens are made to fit virtually any type of rectangular or box sifter including equipment made by Rotex, Great Western, Gump and other OEM's. Screen sizes are available in

12" to 80" widths with lengths made to your specifications. Other shapes and sizes are available upon request.

Each screen can be provided with edge treatments made with white canvas, PVC or black high-temp. Nomex. Center wear strips and stainless steel grommets for automatic screen tension can be provided upon request.

### Hooked Screens

Our Hooked Screens are made to fit various separator manufactured units. They include OEM companies like Tyler-Hummer, Derrick, Link-Belt, J&H, Midwestern, Triple S Dynamics, among others. Canvas inserts are

provided for fine mesh screens for protection against premature screen wear.

Standard galvanized hooks are available in Type 2, Type 3, and Type 5 styles. Stainless steel hooks are also available upon request. Screens can feature a single layer of mesh or a double layer using a coarser mesh for top screen support. A triple layer screen is also available for specialized applications.

### Quoting/Estimate Requirements

Please provide the following information when requesting a quote from your sales representative:

- Screen type
- Screen dimensions
- Special requests of epoxy or spot welds
- Mesh size, wire diameter and alloy
- Make and model of equipment used
- Manufacturing requirements
